

## V-TOL PRESENTS AT SESKOAU DURING AIR POWER 2011, INDONESIA

Information Release – 8 April 2011

At the invitation of TNI-AU (Indonesian Air Force), V-TOL Aerospace, on 6 April, delivered a presentation to the SESKOAU (Air Force Staff College, Bandung) class of 2011. SESKOAU students will be amongst the first to command and control the units responsible for UAS development, operations, training and maintenance support for Indonesia TNI.

The topic, “The Pathway to Sustainable UAS (Unmanned Aircraft Systems) Operations,” introduced the key challenges professional organisations are required to address to reach and maintain safe and sustainable Unmanned Aircraft operations.

The opportunity to present at SESKO-AU was the direct result of the successful efforts by the Defence Material Organisation’s (DMO) “Team Australia” at INDODEFENCE 2010\* and the Australian Defence Staff located in Jakarta.

### Mark Xavier and Nick Gay (V-TOL / AUSA) with Kolonel Diyah Yudanardi at SESKOAU

“V-TOL is well positioned to promote and deliver Australian based commercial UAS services into the SE Asian market. Through the Australian Unmanned Systems Academy (AUSA), we have the core attributes and experience to assist TNI-AU in developing their UAS capabilities, skills and knowledge for safe and sustainable UAS operations,” said Nick Gay, V-TOL and AUSA International Marketing Director.

“We believe that assisting organisations in their UAS capability development will result in long-term working relationships for V-TOL”, said Mark Xavier, V-TOL Managing Director.

V-TOL Aerospace is an Australian leader in UAS technology, flight operations and training.
