## **Cyber Bug Grande Conducts Successful Flight Trials**

Cyber Defense Systems Inc recently conduct a series of very successful flight trials of the largest member of the Cyber Bug Family the “Grande”.

Managing Director of V-TOL Aerospace Mark Xavier said, “the Grande is a very exciting addition to the CDS family of products offering a very stable multi-camera UAS platform capable of 8+ hours of flight operations. Incredible, considering that all flights were hand launched! V-TOL looks forward to investigating the commercial applications of this UAS technology in the Australian and Oceania airspace”.

V-TOL Aerospace Pty Limited is the exclusive CDS Agent for Cyber Defense System products in Australia, NZ and Oceania.
