## V-TOL Takes Delivery of UAV01

V-TOL Aerospace, a Queensland Based Unmanned Aerial Vehicle (UAV) technology company, is proud to announce the delivery of UAV01 a custom designed Mobile UAV Ground Control Station (GCS). UAV01 is the first of a fleet of commercial UAV Flight Services Vans.

V-TOL Managing Director and Chief UAV Controller Mark Xavier said, “UAV01 provides UAV Flight Services a significant capability in the supply of commercial UAV operations including extended, remote, and mobile missions. Multiple UAVs can also be flown simultaneously.”

“UAV01 represents leading edge commercial UAV mobile GCS technology. We look forward to deploying UAV01 in support of our commercial customers in the Australian market place and supporting our various research partners including CRC-SI participants Ergon Energy, and University of New England,” he said.

V-TOL would like to take the opportunity to thank its technology partners for the concerted efforts in getting UAV01 delivered to our required specifications on budget on time.
